Report on Educate Yourself – QUIZ on Importance of Water Conservation

Organised by: SKCET, with the NSS Club

Venue: Lab 1, C4 Block

Date: 10.08.2024

Introduction

Water is a finite and precious resource, and its careful use is essential for the well-being of people, agriculture, industry and the environment. Rapid urbanisation, population growth, pollution and changing rainfall patterns have increased pressure on water resources, making conservation a responsibility that every citizen must share. Young people, in particular, can play a leading role in spreading awareness and adopting water-saving habits.

With this in mind, the NSS Club organised a quiz titled "Educate Yourself: Importance of Water Conservation" on 10.08.2024. The event was open to students from various departments and aimed to build awareness in an engaging, competitive and enjoyable format.

Objectives

- To educate students about the importance of water conservation and sustainable water use.
- To increase awareness of water-related issues such as scarcity, groundwater depletion and water pollution.
- To encourage students to adopt water-saving practices in their daily lives, on campus and at home.
- To promote interaction and teamwork among students from different departments.
- To strengthen the NSS Club's role in promoting environmental awareness and social responsibility.

Inauguration and Welcome

The programme began with a welcome address by the NSS coordinators, who introduced the theme of the quiz and explained why water conservation deserves the attention of every student. The audience was reminded that small everyday actions, such as fixing leaks, avoiding wastage and reusing water, can together make a significant difference.

Topics Covered

The questions covered a range of themes connected with water and its conservation, including:

- The water cycle and the distribution of fresh water on Earth.
- Causes and effects of water scarcity and groundwater depletion.
- Rainwater harvesting and other conservation techniques.
- Water pollution and its impact on health and the environment.
- Important days, campaigns and government initiatives related to water.
- Practical, everyday ways to save water at home and on campus.

Outcomes

- Participants gained knowledge of the importance of water conservation and its practical applications.
- Students were encouraged to adopt water-saving habits in their daily routines.
- Collaboration among students from different departments was strengthened.
- The event highlighted the role of youth in promoting sustainable use of natural resources.
- The NSS Club successfully used a quiz as an enjoyable and effective awareness tool.
