2017-18	Energy Conservation	AditiTejomaya - Solar Powered Vehicle	The objective of this project is to develop a solar powered electric vehicle for internal commutation within the campus. Global warming occurs due to the discharge of carbon dioxide and other air pollutants to the atmosphere as a result of fossil fuel burning. Hence, a battery powered electric vehicle, named, Aditi Tejomaya is proposed and developed to provide pollution free commutation. Using these three wheeled vehicles, one could move in and around the campus using the freely available renewable energy. The vehicles are noise free and uses the solar energy charging station inside the campus to recharge the battery. The vehicle can also be used by the differently abled people. The vehicle will also have a GPS device to locate its position inside the campus.	225000.00	0.00	125
