SKCET | MOU WITH MAXBYTE TECHNOLOGIES

SKCET signed MoU with **Maxbyte Technologies** for Center of Excellence in Industry 4.0. Our beloved Principal Madam **Dr.J.Janet** exchanged MoU with **Mr.C.S.Ramshankar**, Chief Executive Officer, Maxbyte Technologies and **Mr.Surendran**, Chief Autonomous Officer, Maxbyte Technologies.

MoU Highlights:

- Lab setup for Data analytics and Cloud computing
- Industry 4.0 using Robotics and Automation
- Industrial training and certification for faculty members and students
- Patent filing

M.TECH CSE | FDP ON SERVICE NOW APPLICATION DEVELOPER

Nine Days Faculty Development Program on “**Service Now Application Developer Certification**” was inaugurated by our Principal Madam **Dr. J. Janet** on 03.08.2023.

Day 1: Session Highlights:

Fundamentals of the service Portal and the tools required to develop and build portals, essential skills required for ServiceNow developers and benefits of certifications.

CSBS| KAVACH 2023

The promising student team of **CSBS** have emerged as winners with a cash reward of **Rs. 1,00,000/-** in Kavach 2023 - a National level Cybersecurity Hackathon, to envision ideas and frameworks. Amidst a sea of exceptional projects, the team captivated the panel of esteemed judges with their ingenious solutions to the problem statement “**Advanced Fake News Detection**”. Our students have set a foot print battling a tough competition with 3,900 teams across the country.

PS ID: KVH-003

Team name: Fresh Spar

Team Members :

1. Manojkumar C (Team Leader) - III CSBS, Vishal Chinnasamy - III CSBS, Sasidharan R - III CSBS, Sandhya Barathi K - III CSBS, Sri Subiksha T - III CSBS, Yogeeshwaran G - I CSBS

Team Mentors:

Dr.S.Balakrishnan, HOD-CSBS, Dr.Ignisha Rajathi, Associate Professor-CSBS

CSE | KAVACH 2023

Department of **Computer Science and Engineering** feel exhilarated to share that two vibrant student teams from CSE have marked an impact by presenting a revolutionary solution for the provided problem statements in Kavach 2023 - a National level Cybersecurity Hackathon, to envision ideas and frameworks. The winning team has been awarded with a cash reward of **Rs 1,00,000/-**. It's indeed great that our students have set a foot print battling a tough competition with 3,900 teams across the country.

Team Name: Cookie Bytes

PS ID: KVH-003

Problem Statement: Advanced Fake News Detection

Team Members

Rithik Raj K S- III CSE, Jason Jose P- IV CSE, Johans Olivia A- IV CSE, Mrinalini K- III CSE, Siddhesh Agarwal- III CSE, Swamy Prasanna S J- III IT

Team Mentors

Dr. S.Oswalt Manoj, AP/ CSE, Ms. A. Priya, AP/ CSE, Mr. B.Shameer- Alumni 2022 Batch

CSE | KAVACH 2023

Department of **CSE** super ecstatic to share that a team from CSE has secured **runner up position** showcasing their commitment to excellence at Kavach 2023- National level Hackathon organized by Innovation Cell of AICTE along with Bureau of Police Research and Development and Indian Cybercrime Coordination Centre held during August 8-10,2023. Our team left an indelible footprint amidst a challenging contest. The Mentors and the Juries applauded the unparalleled quality of the work and the team effort.

Runner up team:

Team Name: Cyber Core

PS ID: KVH-018

Problem Statement: Plug and Play System

Team Members

- Prithika Andrea Angelina F - III CSE
- Nagasundar N- III CSE
- Sneha Jaharathanan- III CSE
- Mohana Rasad- I CSE
- Maginesh- I CSE
- Mark Felix - I CSE

Team Mentors

CSBS | CUBETHON 2023

Student Tech Enthusiasts from the Department of **Computer Science and Business Systems** have participated in **CUBETHON 2023** the second edition of Kerala's biggest student hackathon on 5th August 2023 at Cochin on the theme "**Bridging the Gap from College to Business.**"

The event aimed to foster entrepreneurial skills among students and empower them to transform their ideas into market-ready solutions. Totally 124 teams registered out of which 19 teams were selected for round 2 and from that top 5 finalists two student teams have won Second prize with a cash prize of Rs. 30,000/- and Third prize with Rs.20,000/-.

Second Prize: Team: A2Z Techvalley

Team Members: Vishal Chinnasamy, Sasidharan Ramachandran, Rohith Kumar B

Third Prize: Team Name: Sentient

Team Members: Shreya S R, Hari Balaji V, Dharshan S, Vidhulaasri T

Team Mentor: Dr.S.Balakrishnan, HoD, CSBS

MCT | GOKART CHAMPIONSHIP 2023

Electric Kart Team **Brainiacs Racing** from the Department of **Mechatronics Engineering** has won **Overall Championships of AIMS _ National Level Gokart Championship 2023** held at Kari Motors Speed way, Coimbatore between 7th and 9th August 2023. The team has also won awards in the following categories:

- First Prize in EV Category with the cash prize of Rs 25000
- Best Endurance with the cash prize of Rs 10000
- Best innovation with the cash prize of Rs 3000
- Best safety award with the cash prize of Rs 3000
- Best Faculty Mentor
- Best Build Quality award
- Best Aesthetics Award
- Best Driver
- Best Captain
- First Vehicle Inspection Clearance Award
- Best Virtual Presentation Award

Mentors: Mr.T.Vignesh AP/MCT, Dr.R.Gopinathan ASP/MCT.

AI&DS | DATA SCIENCE CLUB INAUGURATION

Artificial Intelligence and Data Science has inaugurated the “**Data Science Club**” on 10.08.2023.

Chief Guest: Mr.Neelkumar Vijayakumar, Product Manager, Ancestry, USA, addressed the students on "**Product Management for AI/ML**".

Session Takeaways:

- Product Building
- Product Management in AI/ML
- AI/ML Landscape
- Challenges with AI/ML Products
- Combating with Product sense
- Data Strategy and Acquisition

M.TECH CSE | OUTREACH ACTIVITY

Department of **M.Tech CSE** and **CSD** organized “**Paper Cast Picasso**” on **August 2nd 2023**. The event aimed to engage school students from Government Higher Secondary School, Othakalmandapam, on the theme “**Celebrating Unsung Heroes**”. The participants were engaged in drawing portraits and showing their respect towards the unsung freedom fighters who made significant sacrifices for their country. The winners were appreciated with prizes and motivated to participate in various future competitions.

CIVIL | TRAINING PROGRAM ON FIRE SAFETY MEASURES

Civil Engineering Department, along with Vankatram Learning Centre and National Social Service (NSS) of SKCET organised a Training program on **Fire Safety Measures** (Operating Fire Extinguishers) for all the Department Lab in-charges, System admins, Lab technicians, Powerhouse in-charges, Hostel in-charges, attenders and canteen workers. Fire safety training sessions were delivered by **Mr. B. B. Patil**, Chief Executive, Padmalata Enterprises-Safety and Fire Protection Engineers. The participants were trained to identify the conditions capable of causing fire, usage of fire extinguisher, respond appropriately to fire emergencies and follow the fire evacuation plan, adequately implement fire emergency procedures. The coordinators of the program were Dr. P. Saravanakumar, HoD/Civil and Dr. A. Fazlur Rahman, Librarian

Skillset developed:

- Successfully extinguish fires with the use of a fire extinguisher.
- Carry out a simple fire risk assessment on the premises.
- Understand and use the principles of fire suppression.
- Understand the behaviour of fire during its propagation.

CIVIL | TRAFFIC CUM ACCIDENT SURVEY

Student team of **Third year Civil Engineering** along with **Mr. R. Vighnesh**, Assistant Professor, Civil Engineering conducted Traffic survey and accident hotspot analysis for the road junction between Sundarapuram signal and Madukkarai market on 1st and 2nd August 2023 respectively. The study is a part of the 2nd accident hotspot analysis organised by the Addl. Director General of Police, Special Task Force, Road Safety to identify the reasons for the fatal and non-fatal accidents. Students were also asked to prepare reports and AutoCAD drawings explaining the engineering solutions for reducing the accident rate in the areas, which will be submitted to the Special Task Force, Road Safety for implementation.

List of the students who took part in the survey

S. No	Name of the student	Year of study
1	ABISHAKE S	III Year
2	FEBISH M	III Year
3	KALAI DHARAN R	III Year
4	NITHISH KUMAR M	III Year
5	NITIN S	III Year

SOM | HANDLOOM FASHION SHOW 2023

The preliminary round of Handloom fashion show was organized on 21st July 2023 at SKCET Convention Centre. Mohammed Toufiq, student of **First year MBA** was one among the selected 2 candidates from SKCET. The grand finale of the Handloom Fashion Show was organized on National Handloom Day - 7th Aug 2023, at SNR Auditorium and our Elegant Fashioner **Mohammed Toufiq** has won the award under the category “**Handloom Elavarasan – Best Presentation**”. **Mrs. Vanathi Srinivasan**, Member of National President of the Women's Wing and **Actress Kushboo Sundar** presided over the ceremony.

MECH | GUEST LECTURE ON PROJECT MANAGEMENT AND EXPECTATIONS FROM CORE INDUSTRIES

Association of **Mechanical Engineers** organized a Guest Lecture on “**Project Management and Expectations from Core Industries**” on 04.08.23. The resource person for the event was **Mr.C.M.Gopi**, Associate Project Manager, Automotive Steering, Bosch Global Software Technologies, Coimbatore. **Final** year students from the department of **Mechanical Engineering** attended the session. Project Management Tools, 5C’s of Project Management and Roles of Project Manager were pointers of discussion.

M.TECH CSE | CLASS COMMITTEE MEETING

Department of **M.Tech Computer Science and Engineering** conducted a **Class Committee Meeting** for the **Final** year students of **M.Tech CSE** on 27th July 2023. **Dr.Ramamoorthi**, Professor, Department of **Mechanical Engineering** chaired the meeting. The points of discussion were: 9th semester courses, Internships, Placement Training classes and Projects.

IT | TUTOR WARD MEETING

Tutor Ward Meeting was conducted for the **Third** year **IT** students on 10.08.2023. The following points were discussed:

- Self-Practice through week end coding contest
- Punctuality
- Attendance
- Importance of Internal marks
- Mini projects
- Placement preparation

M.TECH CSE | CLASS COMMITTEE MEETING

Department of **M.Tech Computer Science and Engineering** have conducted a Class Committee Meeting for the Pre- final year students of **M.Tech CSE** on 27.07.2023. **Dr.K.P.Yuvaraj**, Associate Professor, Department of Mechanical Engineering chaired the meeting. The pointers of discussion were: Academic regulations, Syllabus completion, Tutor ward system, Value Added Course, Participation in Hackathon and other competitions, Maintaining Discipline, Dress code and punctuality.

M.TECH CSE | CLASS COMMITTEE MEETING

Department of **M.Tech Computer Science and Engineering** conducted **Class Committee Meeting** for the **Third** year students of **M.Tech CSE** on 03.08.2023. **Dr.G.Shobana**, Associate Professor, Department of **Information Technology** chaired the meeting. The pointers of discussion were: Academic regulations, Syllabus completion, Guidelines for CIA-I exam, Participation in Hackathon and other competitions, Maintaining Discipline, Dress code and punctuality.

EEE | TUTOR WARD MEETING

Mr.R.Kavin, Assistant Professor, **EEE** conducted Tutor ward meeting for the **Third** year EEE A section students. The pointers of discussion were: Effectiveness of class, ICT course completion, Motivating the students to participate in the project expo, hackathon, advised to avoid absence for Industrial training classes and general discipline inside the campus.

EEE | TUTOR WARD MEETING

Ms.N.Subhalakshmi, Assistant Professor, **EEE** conducted **Tutor Ward Meeting** for **Third** year **EEE B** section students. The pointers of discussion were: effectiveness of class, ICT course completion, participation in project expo, hackathon, advised to avoid absence for Industrial training classes and general discipline inside the campus.

TESTIMONIAL BY PLACED STUDENTS

Being a part of SKCET has opened a lot of opportunities for me. Life at SKCET has been an amazing journey and I express my heartfelt gratitude for providing us the state of art facilities which enabled me to nurture my skills and learn new ones. I am particularly grateful for the placement training that was provided to us. This training has helped me towards a great career ahead, and I am confident that I have the skills and knowledge to excel in my chosen field. I know that I am not just taking away knowledge from SKCET, but also some life lessons that will always be with me. I would like to take a moment to express my deepest gratitude to my department faculty members who helped me hone my skills, challenged me to think critically, to pursue my passions, and to constantly strive for excellence and encouraged me in every step of my journey. I am very much grateful to my parents for choosing SKCET. Thanks to our Principal Madam and the entire SKCET faculty team.

**OVIYAA M,
CIVIL (2023 BATCH)
SCHLUMBERGER**

TESTIMONIAL BY PLACED STUDENTS

Firstly, I would like to express my heartfelt gratitude to Sri Krishna Family.

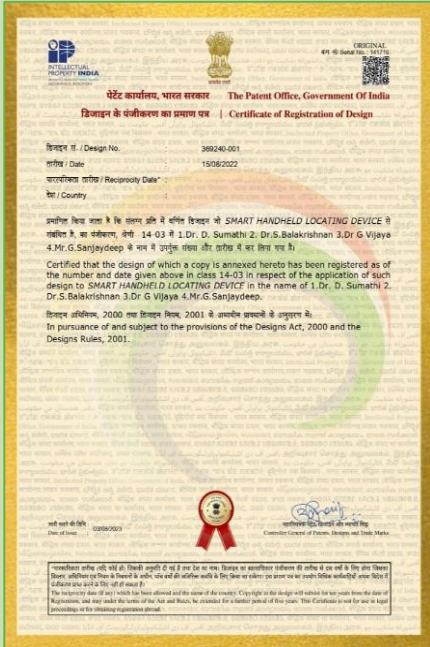

I would also like to extend my regards and thanks to the professors of my department who are integral to my success and enabled me to have a positive approach in life. I am privileged to be a part of the SKCET family. The management provided us with excellent placement training programs and numerous campus interview opportunities. I can say that SKCET has been the best part of my life and I admire the support and dedication I received from the management and my EEE department. We were well trained for placements and because of the training I got placed in ZOHO. I genuinely thank all the friends, staff members and professors who made my college life a happy memory.

A Novel Design of Smart and Intelligent Soldier Supportive Wireless Robot for Military Operations

Publisher: IEEE [Cite This] [PDF]

C. Ganaprakasam ; M. Swama ; R. Geetha ; G.Saranya ; Shakti Murugan K.H. All Authors

Abstract: There is an increasing desire for the deployment of military robots in today's politically unstable globe to help soldiers complete dangerous operations. The Military Rescue Robot is well-suited for performing hazardous duties including bomb disposal, observation of hostile territory, and search and rescue operations. The military and law enforcement are finding more and more uses for robots and their ancillary systems as these systems grow more technically advanced, dependable, and compact. Armed forces are increasingly relying on mobile robots for tasks like patrolling and defusing bombs. Many apps available online make use of the Bluetooth, Wi-Fi, and ZigBee technologies already present in these mobile phones in order to facilitate the remote management of additional gadgets. The livestream from the camera module and the data analysis of environmental composition by various sensors of the area under observation may help the military best prepare for missions. Arduino and ZigBee are advanced devices that might be used to achieve the aforementioned aims. The ZigBee is linked to the Arduino mega, which in turn is linked to the various sensors and the robotic arm. ZigBee technology is used for data transmission and reception.

Solar irradiation-driven synthesis of biodiesel from composite oil using biomass catalyst and process parameters optimization

Balamurugan S^a, Seenivasan D^b, Veera Kumar A^b and Pritam S. Kalos^c

^aDepartment of Mechanical Engineering, Sri Krishna College of Engineering and Technology, Coimbatore, Tamil Nadu, India; ^bDepartment of Mechanical Engineering, Coimbatore Institute of Engineering and Technology, Coimbatore, Tamil Nadu, India; ^cSchool of Mechanical Engineering, MIT Academy of Engineering, Pune, India

ABSTRACT
Developing countries like India are highly dependent on fossil fuels, which constitute about 70% of their total energy needs. However, the availability of fossil fuel resources is constantly declining worldwide due to their abundant usage. In the process of burning fossil fuels, harmful gases are emitted into the atmosphere and pollute the air we breathe. Biodiesel is a clean and promising renewable energy source for meeting future energy demands. In this study, a solar irradiation driven transesterification setup is developed to generate biodiesel from composite oil using a waste eggshell derived catalyst. The aim is to address the techno-economic and sustainability challenges associated with biodiesel production. To perform transesterification experiments, a Taguchi L9 orthogonal design matrix is created. Experimental optimization revealed that the best process variables for producing high yield biodiesel of 90% were 2wt% catalyst loading, 60°C thermal state, and a 6:1 composite oil to methyl alcohol ratio in molar. The biodiesel produced underwent testing to assess its physical and chemical properties, following the guidelines outlined in the ASTM D6751 standards. The proposed solar irradiation driven transesterification setup, composite oil, and waste eggshell derived catalyst proved to be an effective and green renewable resource for producing sustainable biodiesel.

ARTICLE HISTORY
Received 7 April 2023
Accepted 29 July 2023

KEYWORDS
Biodiesel; composite oil; optimization; eggshell catalyst; solar irradiation

Mr. S. Balamurugan, Assistant Professor, Mechanical Engineering has published a scientific article entitled ‘Solar irradiation – driven synthesis of biodiesel from composite oil using biomass catalyst and process parameters optimization’ in Biofuels – A Taylor & Francis publications. It is a SCI, WoS and Scopus Indexed Journal with an Impact Factor 2.731. The journal is enlisted in Anna University Annexure 1 list.

ABSTRACT
The healthcare industry is one of the world's fastest growing, and the impact of artificial intelligence (AI) is already being felt. AI is changing the way healthcare is delivered, from reducing administrative processes to offering individualized patient care. AI is predicted to have a significant impact on healthcare in the next years. Its possible applications range from bettering patient care and outcomes to lowering healthcare expenses. Diagnostics is one area where AI has the potential to have a substantial effect. AI-powered diagnostic technologies have the potential to transform how diseases are discovered and treated. AI-based diagnostic tools can find patterns and connections in big data sets that the human eye may miss. AI can also be utilized to create patient-specific treatment strategies.

How to Write Code Better: Some Best Practices

Here is some practical guidance on writing high-performance app code. By implementing these best practices, businesses can code their way to a smoother app experience, happier users, and a competitive edge in the current digital landscape.

In today's digital age, a well-performing app is paramount to the success of any business. Writing code is an essential part of developing any modern application, and it is crucial to ensure that the code you write is structured, optimised and efficient. Poorly written code can have significant consequences such as slow loading times, crashes, and even user frustration.

As the performance of any app highly depends on how well the code is written, adopting best practices is essential to ensure that the app runs smoothly, loads faster, and provides an excellent user experience. Whether you are a seasoned developer or just starting to code, the best practices outlined in this article will help you to improve your coding skills and become a better app developer.

Purpose of implementing coding standards
The purpose of having coding standards is to ensure that code is written in a consistent and maintainable manner, allowing for easier collaboration among team members and reducing the likelihood of errors and bugs. Coding standards also aid code readability, simplify debugging, and improve application performance. They ensure that code is written with clarity, readability, and standardisation, making it more comprehensible for future development and maintenance. Additionally, these standards facilitate code reviews, reduce development time, and enforce good programming practices.

Reasons for writing clean and efficient code for apps
Readability: Clean code is easy to read and understand. When the code is clean, other developers can quickly understand its purpose and easily maintain it in the future. Clean code also makes it easier for developers to identify and fix errors faster.
Maintainance: Writing clean code reduces the time it takes to maintain the application. An application that uses clean code is more likely to be error-free and easier to maintain in the long run, which can save developers a lot of time and resources.

Scalability: Clean code is more scalable than messy code. Developers can add new features to an application faster and more efficiently with clean code. Also, clean code makes it easier to refactor the code if necessary.
Debugging: Efficient code makes it easier to debug applications, and identify code errors and fix them.
Performance: Efficient code can improve application performance. Writing clean and efficient code can help you avoid memory leaks and performance issues, resulting in a faster and more responsive application.

What you should know before starting app development
Before diving into app development, it's important to lay a strong foundation. You will need to put some thought into that.

IT | ALUMNI INTERACTION

Mr. Gowtham, (2018-22 Batch) Software Developer, **AntWorks**, Chennai, alumni of the Department of **Information Technology**, interacted with his juniors on 26.07.2023. He encouraged the Final-year students to engage in hackathons by briefing the students about his experience in winning Police hackathon, and internship experiences. He also described the methodology and technology stack used in coding competitions. It was an interactive event in which students asked questions about the technical aptitude tests and interview procedure.

ECE | STOCK MARKET ANALYSIS AND TRADING WITH THE HELP OF AI

In the fast-paced world of stock market analysis and trading, AI has emerged as a powerful tool to enhance accuracy and efficiency. Through complex algorithmic predictions, AI systems are capable of forecasting market trends and identifying patterns that may not be easily recognizable by human traders. One of the key advantages of using AI in stock market analysis is its ability to mitigate risks. By analyzing vast amounts of historical data and real-time market information, AI algorithms can make predictions with a higher degree of accuracy compared to traditional methods. This enables traders to make more informed decisions and minimize potential losses.

Additionally, AI-powered trading systems, also known as algo-trading, have gained popularity in recent years. These systems use advanced algorithms to automatically execute trades based on predefined criteria. By leveraging AI's predictive capabilities, algo-trading can identify patterns and execute trades at optimal times, potentially maximizing profits for investors.

The integration of AI into stock market analysis brings significant benefits by providing accurate predictions and efficient trading strategies. However, it's important to note that human expertise is still crucial in interpreting the results generated by these algorithms and making informed decisions based on the insights provided by AI systems.

Moreover, AI-powered systems have also paved the way for algo-trading, where trading decisions are executed automatically based on predefined rules and algorithms. This eliminates human emotions and biases from the decision-making process, leading to potentially more consistent results.
