## PLACEMENT & TRAINING

## PLACEMENT | TESTIMONIAL BY PLACED STUDENTS

My experience in SKCET was an amazing one. It was very positive and motivating in every way- there are opportunities for research, projects, jobs, internship and committees. It provided us enough knowledge and experience to excel in the field of choice. These experiences helped me in a lot of ways, improving my communication skills, technical skills and management skills all of which are essential for a good career. Overall, I believe that SKCET presents a very conducive environment for an enriching experience. I would like to specially thank the placement cell for guiding me and providing me a good platform for my career and also helped me to secure my Placement in LTTS. Thanks to my parents, SKCET Management, Principal and the entire SKCET family for the wonderful opportunity.

**DEEPAK KUMAR, IT (2021 Batch)  
LTTS**

My four years in this SKCET was a great and a wonderful memory to cherish for my lifetime. It was full of learning and grooming one's own self. It gave me an opportunity to meet different kinds of people and learned many things. The college provided lot of opportunities for students to expand not only their technical acumen, but more importantly, develop approaches for problem solving, and analysis, which aids in career growth. I would like to specially thank the placement cell for guiding me and providing me a good platform for my career. I am very much grateful to my parents for choosing SKCET. Thanks to our Principal Madam and entire SKCET faculty team.

### DESIGN STEPS TO ACHIEVE THE OBJECTIVES

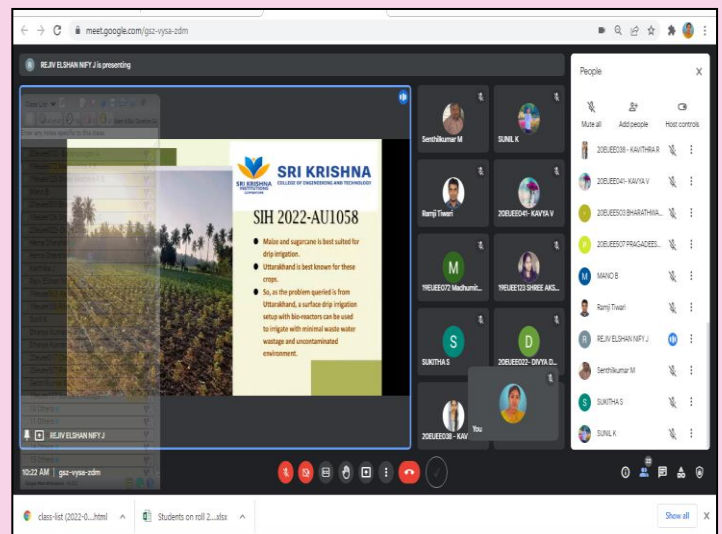

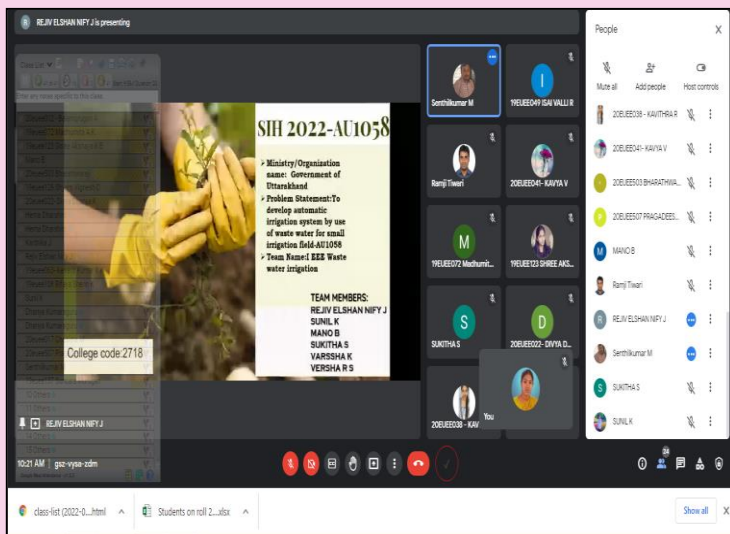

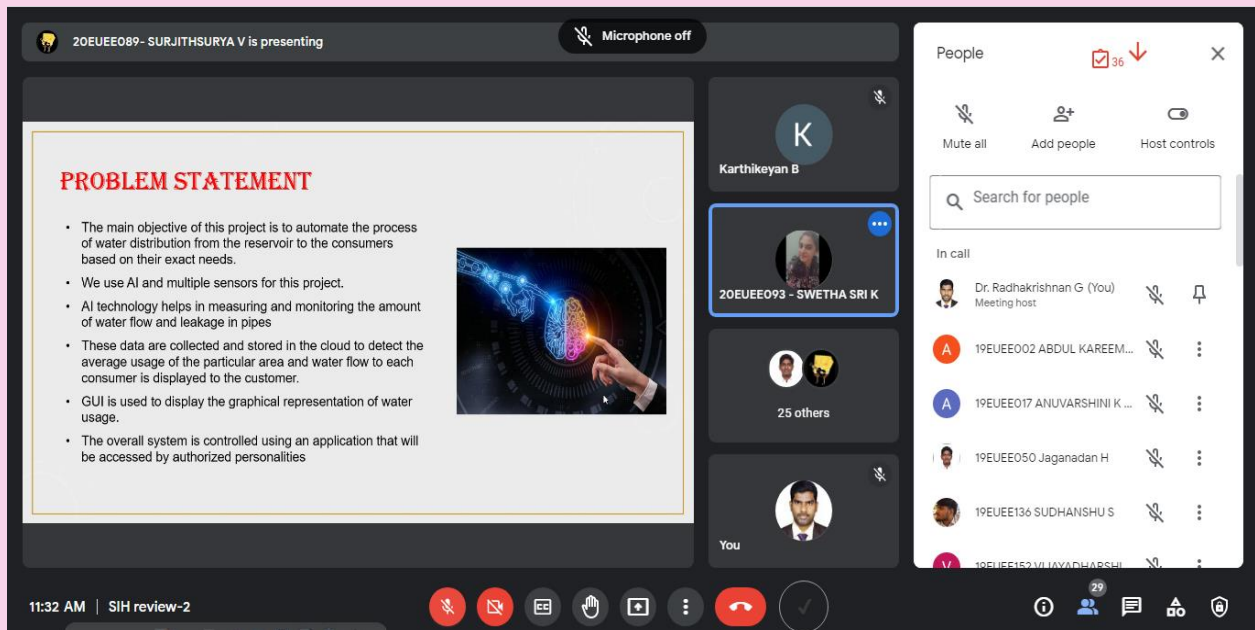

- First the sensor values are taken from Humidity, temperature, PH, Nitrogen, Moisture sensor and the sensor values are fed to the machine learning algorithms.
- Machine learning Algorithm are done by using Raspberry pi. For predicting the output, the machine learning algorithms are trained using sample datasets.
- After training is done, based on the sensor value the high accuracy machine learning algorithm will be providing the output through the web page.
