## SRI KRISHNA COLLEGE OF ENGINEERING AND TECHNOLOGY

An Autonomous Institution affiliated to Anna University, Chennai Kuniamuthur, Coimbatore - 641 008

## **DEPARTMENT OF CIVIL ENGINEERING**

BE CIVIL ENGINEERING
CURRICULUM AND SYLLABI
REGULATION 2022 (B: 2024-2028)
CHOICE BASED CREDIT SYSTEM

#### SRI KRISHNA COLLEGE OF ENGNEERING AND TECHNOLOGY

An Autonomous Institution Affiliated to Anna University
Kuniamuthur, Coimbatore - 641 008

#### VISION AND MISSION OF THE DEPARTMENT

#### **Our Vision**

To be a center of excellence in Civil Engineering Education through full-fledged learningexperience along with research.

#### **Our Mission**

#### To accomplish our vision, we are committed to

- M1: Faculty experts from all specialization of Civil Engineering to facilitate teaching learningprocess
- M2: Excellent infrastructure facilities to apply Civil Engineering knowledge and perform societalbased research
- M3: Exposure to latest technologies in Civil Engineering through industry-institute interaction and professional bodies
- M4: Environs to develop their innovative thoughts, ethics, communication, inter- and intra-personal skills
- M5: Enthusiasm towards self-learning, social responsibility and entrepreneurship

#### **Program Outcomes (POs):-**

At the time of their graduation students of Civil Engineering Program should be in possession of the following Program Outcomes

- PO 1. **Engineering knowledge:** Apply the knowledge of mathematics, science and engineering fundamentals for the solution of complex Civil Engineering problems.
- PO 2. **Problem analysis:** Identify, formulate and analyse complex Civil Engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.
- PO 3. **Design/development of solutions:** Design solutions for complex Civil Engineering problems and design system components with appropriate consideration for public health & safety, cultural, societal and environmental considerations.

| SKCET | Civil Engineering | R2022 (B: 2024-2028)

- PO 4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis & interpretation of data and synthesis of the information to provide valid conclusions.
- PO 5. **Modern tool usage:** Create, select & apply appropriate techniques, resources, modern engineering and IT tools, including prediction and modeling to complex Civil Engineering activities, with an understanding of the limitations.
- PO 6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal & cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO 7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO 8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities as well as norms of the engineering practice.
- PO 9. **Individual and team work:** Function effectively as an individual, a member or leader in diverse teams and in multidisciplinary settings.
- PO 10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO 11. **Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO 12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **Program Educational Objectives (PEOs):-**

The following Program Educational Objectives are designed based on the department mission

- To apply knowledge of mathematics, science and engineering to solve existing problems in the area of Structural, Geotechnical, Water Resources, Environmental, Transportation, Urban Planning, Construction Materials and Management in Civil Engineering
- 2. To analyze, design, construct Civil Engineering traditional and modern structures

- 3. To perform investigation on any complicated Civil Engineering problems by conducting research using modern equipment's and software tools
- 4. To communicate and develop strong inter- and intra- personal skills to prepare them for placement and higher studies
- 5. To be self-motivated towards lifelong learning and entrepreneurship

## **Mapping of POs to PEOs**

Program	Program Outcomes											
Educational Objectives	1	2	3	4	5	6	7	8	9	10	11	12
PEO 1	3	2	3	2	2	3	2	2	3	3	3	2
PEO 2	3	3	2	2	3	2	2	2	2	2	2	3
PEO 3	3	3	3	2	3	3	2	2	2	3	2	3
PEO 4	3	3	2	2	3	2	2	2	2	2	2	3
PEO 5	3	3	3	2	3	3	2	2	2	3	2	3

1	Reasonably agreed	2	Moderately agreed	3	Strongly agreed	Ī
---	-------------------	---	-------------------	---	-----------------	---

## **Program Specific Outcomes (PSOs):-**

At the end of the Program, Graduate shall have

PSO 1	Analytical Knowledge	The ability to analyse, design and interpret by applying							
	and Practical Skills	the concepts of mathematics and physical sciences in							
		the core areas of Civil Engineering.							
PSO 2	Civil Engineer and	The propensity to excel in portfolio of waste							
	Sustainability	management, sanitation, housing and construction							
		management for the sustainable environment.							
PSO 3	<b>Environment and</b>	The ability to acquire and update knowledge							
	Social Commitment	continuously and offer engineering solutions to meet							
		the environmental and societal needs.							

# B.E. CIVIL ENGINEERING REGULATION 2022 (B: 2024-2028)

## I – VIII SEMESTER CURRICULUM AND SYLLABI

SEME	SEMESTER I											
SL. No.	Course Code	Course	L	Т	Р	Contact hrs./wk.	С	Ext / Int	Cat.			
1	23CE101	Introduction to Civil Engineering	3	0	0	3	3	60/40	HSMC			
2	23MA101	Mathematics I	3	1	0	4	4	60/40	BSC			
3	23EE113	Fundamentals of Electrical and Electronics Engineering	2	1	0	3	3	60/40	ESC			
4	23TA101	Heritage of Tamils	1	0	0	1	1	60/40	IKS			
5	23EN101	Oral and Written Communication Skills	2	0	2	4	3	50/50	HSMC			
6	23CS101	Problem solving using C++	1	0	4	5	3	50/50	ESC			
7	23CE103	Design Thinking and Workshop Practices	1	0	3	4	2.5	50/50	ESC			
8	23CE102	Engineering Graphics Laboratory	0	0	3	3	1.5	40/60	ESC

23CE101			INTRODUCTION TO CIVIL ENGINEERING	3/0/0/3
Nature	of Co	urse	Theory	
Prereq	uisites	3	Nil	
Course	e Obje	ctives:		
1	To un	derstand al	bout civil engineering structures and civil engineering materia	als
2		strate the d	components of a building and impart knowledge on various a uction	spects
3		cquaint ea eering	rth's structure and comprehend the significance of geo	ology in civil
4	To im	part knowle	edge about the impacts of human activities in environment	
Course Upon o			course, students shall have the ability to	
1 0101.1			d the scope of civil engineering and importance of civil ag structures	[U]
C10	1.2	Identify bu	ilding materials required for appropriate construction	[U]
1 (.101.5 )		Recognize construction	ebuilding components and various aspects of building ons	[AP]
C101.4 Classify th			e rock types and identify their uses	[U]
C10	1.5	Illustrate the	ne geological structure and their relevance in civil	[U]

## **Module 1: Civil Engineering Structures and Materials**

15 Hrs

Scope of civil engineering - functions of a civil engineer - relevance of civil engineering in overall infrastructure development of a country - civil engineering structures: buildings, bridges, dams, roads, railways, runways, tunnels, towers, chimneys, retaining walls, water tanks, cooling towers and silos - building materials: bricks, stones, aggregates, m-sand, cement, concrete, steel, plywood, aluminum, GI sheet, PVC - emerging construction materials

### **Module 2: Building Components and Construction**

15 Hrs

Selection of site – building components – foundation, basement, wall: stone masonry, brick masonry, column, floor, beam, roof, reinforced concrete members, staircase, lintel, slab, truss and damp-proof course - design and construction sequences of a building - maintenance, repairs and rehabilitation – fundamentals of town planning and smart cities – building bye laws - green building –applications of software and IoT in civil engineering

### **Module 3: Geology and Environment**

15 Hrs

Geology in civil engineering – branches of geology – structure of earth and its composition – tectonic plates – continental drift - earth's atmosphere - weathering of rocks - classification of rocks: igneous (granite, basalt), sedimentary (sandstone, limestone) and metamorphic (schist, gneiss, marble) – strike, dip - folds, faults and joints:relevance to civil engineering – human and environment – pollution: water, air, soil, noise

Total Hours	45 Hrs.

## MODULE I: LOGICAL PROOF'S& FUNCTIONS

(20 Hrs)

**Proofs:** Definitions - Proof by cases - Proof by contradiction - Logical formulas - Propositions - Truth table - Logical operators - Tautologies and Contradictions - Contrapositive - Equivalences and implications - Predicates - Free and bound variables - Quantifiers - Universe of discourse - **Sets:** Basic sets - Operations on Sets - Law on Sets(without proof) - Cartesian product of sets. **Relations:** Binary relation-Types of relations and their properties - Relational matrix and graph of a relation - Equivalence relations - Partial ordering relation**Functions:** Classifications of functions - Induction - Ordinary induction and Strong induction - Recursive data types - Definition of recursive and structural induction.

### **MODULE II: NUMBER THEORY & GRAPH THEORY**

(20 Hrs)

**Number Theory:**Divisibility - Greatest common divisor - Euclid's algorithm - Prime numbers-Fundamental theorem of arithmetic - Modular arithmetic - Remainder arithmetic - Multiplicative inverses and cancelling - Relatively prime - Euler's theorem.- Chinese Reminder Theorem**Graph Theory:**Vertices and Degrees - Types of graphs - Handshaking theorem - Adjacency matrices - Walks and paths - Connectivity - Isomorphism - Directed acyclic graphs and scheduling - Matchings - The Stable marriage problem - Forests and trees - Spanning trees - Minimum weight spanning trees - Prim's algorithm - Kruskal's algorithm.

### MODULE III: COUNTING &PROBABILITY(20 Hrs)

Sums and Asymptotics-Sums of Powers-Harmonic Numbers-Asymptotic Notation-The Division Rule-Counting Subsets-Sequences with Repetitions-The Pigeonhole Principle-Events and Probability Spaces-The Four Step Method-Conditional Probability-The Four-Step Method for Conditional Probability-The Law of Total Probability-Baye's theorem-Random Variables—Discrete and continuous random variables - Distribution Functions-Bernoulli Distribution-Uniform Distribution-Binomial Distribution-Great Expectations-Conditional Expectation-Linearity of Expectation-Infinite Sums-Expectations of Products

23EE113	Fundament	als of Electrical and Electronics Engineering (Common to MECH and CIVIL)	2/1/0/	/3				
Nature of	Course	G (Theory analytical)						
Course Pr	e-requisites	Nil						
Course Ok	Course Objectives:							
1	To import the	students with a basic understanding of Electrical c	ircuits.					
2	To learn the v	vorking principle of static machine.						
To understand the rotating Machines working principles and to have a know								
3	on selection of machine for specific types of applications.							
4	To give a com	prehensive exposure to Electrical installations.						
Course Ou	itcomes:							
Upon com	pletion of the	course, students shall have ability to						
C113.1	Analyze the c	oncepts in AC circuit and DC circuits.		[A]				
C113.2	Examine the v	vorking principle of Static machines.		[A]				
C113.3	Understand th	ne working principle of Rotating machines.		[U]				
C113.4	Utilize the bas	sic components for Electrical installations.		[AP]				
C113.5	Interpret the b	pasic devices in Electronics and Instrumentation.		[A]				

**Course Contents:** 

#### **Module I: DC Circuits and AC Circuits**

15 Hrs

**DC Circuits** - Electrical circuit elements (R, L and C) - Voltage and Current Sources - Kirchoff's current and voltage law - analysis of simple circuits with DC excitation - Mesh and Nodal Analysis. **AC Circuits** - Representation of sinusoidal waveforms, Peak and RMS values, Phasor representation, Real power, Reactive power, Apparent power, Power factor. Analysis of single phase ac circuits consisting of R, L, C, RL and RC. Three phase balanced circuits - Voltage and Current relations in star and delta connections.

#### **Module II: Electrical Machines and Installations**

15 Hrs

Static machines: BH characteristics, construction & working principle of single-phase and three phase transformers. Rotating machines: Generation of rotating magnetic fields, construction and working principle of DC machines, three-phase induction motor and synchronous motor. Components of LT Switchgear - Switch Fuse Unit (SFU), MCB, ELCB, MCCB, Domestic wiring, Types of Wires and Cables, Earthing.

# Module III: Fundamentals of Semiconductor Devices and Instrumentation 15 Hrs

Semiconductor - PN junction diode - Zener diode - Bipolar Junction Transistor Introduction - Field Effect Transistor Introduction - Construction and characteristics of JFETs - MOSFET - Depletion type MOSFET, Enhancement type MOSFET, Transfer characteristics. Sensors, Solenoids, Pneumatic controls with electrical actuator, Mechatronics, types of valves and its applications, Electro-Pneumatic systems, Proximity sensors, Limit switches.

23TA101	HERITAGE OF TAMILS / தமிழர்மரபு	1/0/0/1				
Nature of 0	Course: C (Theory Concept)					
Pre requis	ites: NIL					
Course Ob	jectives:					
1	To know various concepts of Tamil Language families.					
2	To know about the essentialities of Heritage.					
3	To understand the Aram concepts of Tamils and the cultural influence.					
Course Ou	itcomes:					
Upon com	pletion of the course, students shall have ability to					
C101.1	Know about the language families in India, impact of religion contribution of Bharathiyar and Bharathidhasan.	is and the [U]				
C101.2	Observe the growth of sculpture, making of musical instruments a of temples in socio and economic lives.	ind the role [U]				
C101.3	Understand the significance of folklore and martial arts.	[U]				
C101.4	Learn the sangam literature, sangam age and overseas conquest	of Cholas. [U]				
C101.5	Understand the contribution of Tamils to Indian Freedom Strugg Siddha medicine and print history of Tamil Books.	gle, role of [U]				

Manuscripts – Print History of Tamil Books.

Language and Literature: Language Families in India - Dravidian Languages - Tamil as a Classical Language - Classical Literature in Tamil - Secular Nature of Sangam Literature - Distributive Justice in Sangam Literature - Management Principles in Thirukural - Tamil Epics and Impact of Buddhism & Jainism in Tamil Land - Bakthi Literature Azhwars and Nayanmars - Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

Heritage - Rock Art Paintings to Modern Art - Sculpture: Hero stone to modern sculpture - Bronze icons - Tribes and their handicrafts - Art of temple car making - - Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments - Mridhangam, Parai, Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils. FolkAndMartialArts: Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leather puppetry, Silambattam, Valari, Tiger dance - Sports and Games of Tamils.

Thinai ConceptOfTamils - Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature - Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age - Export and Import during Sangam Age - Overseas Conquest of Cholas. ContributionofTamilstoIndiannationalmovementandindianculture:Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India - Self-Respect Movement - Role of Siddha Medicine in Indigenous Systems of Medicine - Inscriptions &

To highlight the essential aspects of effective oral and written communication necessary for professional success.											
3	To expand the skills of the students in preparing job search artefacts and negotiating their use in GDs and interviews.										
4	To enable students to communicate contextually in specific, personal and professional situations with courtesy.										
5	To enrich students to carry out day-to-day communication at the facilitate efficient interpersonal communication.	e workplace and									
Course Ou											
•	pletion of the course, students shall have ability to										
C101.1	Remember and expand writing skills through guided activities.	R									
C101.2	Apply communication skills in a corporate environment.	AP									
C101.3	Analyse and collaborate better with colleagues, building stronge professional and personal relationships.	r AN									
C101.4	Apply technical writing skills to write letters, emails and prepare technical documents.	AP									
C101.5	Analyze and communicate effectively in personal and professional situations.	AN									

#### Module I

Reading: Reading techniques -Skimming and scanning - Cloze reading - Reading and understanding technical articles - Reading for detailed comprehension: Email and letters - Reading advertisements - Table completion: Interpreting charts and graphs - Verbal reasoning - Comprehending reviews - Reading and responding to instant messages.

#### Module II

Writing: Formal letters (Sales letter, calling for quotations, seeking clarification, placing an order, complaint letter, inviting, accepting and declining letters) - Emails - Minutes of meeting - Professional report writing - Proposal writing - Resume / job application letter - Case study.

## **Module III**

Listening: Situational listening - Listening about an experience - Listening about short extracts - Listening an interview - Conversational speaking. Speaking: Conversational speaking - Decipher the picture given and answer the question posed along with it - Decipher the mind map given and speak about it - Listen to the questions posed and answer them appropriately.

Lab Compo	onents									
1	Conversational listening	[U]

23CS101 PROBLEM SOLVING USING C++									
Nature	of Course K (Problem Programming)	•							
Pre rec	uisites NIL								
Course	Course Objectives:								
1	To learn the fundamental programming concepts and methodologies which are essential to build good C++ programs.								
2	To gain knowledge on control structures and functions in C++.								
3	To provide the basic object-oriented programming concepts and apply them in problem solving.								
4	To introduce file streams and operations for storing data permanently.								
5	To know generic programming paradigm.								
Course	Outcomes:								
Upon c	ompletion of the course, students shall have ability to								
C101.1	Illustrate the fundamental concepts and methodologies required to develop a program for given problems.	[U]							
C101.2	Develop a program for real-time problems with pointers and objects.	[AP]							
C101.3	Apply the Constructors, destructors, and Overloading concepts to solve the solve.	[AP]							
C101.4	Develop C++ programs with Interfaces, Exception and File processing	[AP]							
C101.5	Implement the concepts on file streams, I/O and Lambda Expression.	[AP]							

### **Module I C++ Programming Fundamentals**

15 Hours

C vs C++, Basic of OOPS, the main () function, Header files, Basic Input and Output (I/O) using cin and cout, Variable, Constant. **Operators:** Arithmetic Operators, Assignment Operators, Relational Operators, Logical Operators, Bitwise Operators, Other Operators, Operator Precedence. Control Statements: if, if...else and Nested if...else, switch case, break and continue, Loops - for loop, while loop, do while loop, goto. **Arrays and Strings:** 1D array, 2D array, Strings, String functions. **Function:** Basics, call by value, call by reference & return by reference, Inline function, overloading Functions, inline Functions, Recursive Functions. **Pointers:** Pointer, Dynamic Memory Allocation.

## **Module II Object Oriented Concepts**

15 Hours

Classes and Objects, public, private, protected. **Constructors and destructors**: Overloaded Constructor, Copy Constructor, Shallow Copying Deep Copying. **Overloading:** this' Pointer, structs vs Classes, Friends of a class, Operator Overloading, Inheritance, Overloading vs Overriding, Polymorphism, Virtual Functions, Pure Virtual Functions and Abstract Classes.

### **Module III Files and Generic Programming**

15 Hours

Abstract Classes as Interfaces, Exception, Files, Streams and I/O, STL, Generic Programming, Lambda Expression.

	Total Hours (Theory) 45 Hours								
Lab Co	Lab Component								
S.No.	Lab Exercise								
1.	Practice of C Programming using Branching and Iterative constructs.								
2.	Programs using arrays and strings.								
3.	Programs using Functions.								
4.	Programs using Structures and Pointers.								
5.	Programs using classes and objects.								
6.	Programs using constructor and destructor.								
7.	Programs using method overloading, operator overloading and polymorphism concepts.								
8.	Programs using friend class.								

9.	Programs using virtual functions and abstract class.
10.	Programs using inheritance concepts.
11.	Programs using exception handling concept.
12.	Programs using Files.
13.	Mini project

C204.5	Apply	Fourier series	s solutions to the engineering problems		[AP]						

#### **Course Contents**

#### MODULE I - DIFFERENTIAL AND INTEGRAL CALCULUS

(20 Hrs)

Curvature, Centre, Radius and Circle of curvature in Cartesian co-ordinates – Evolutes – Envelopes – Evolute as envelope of normals. Definite integrals: Evaluation of definite integrals using Bernoulli's formula - Double integration in Cartesian coordinates – Area as double integral – Triple integration in Cartesian coordinates – Volume as triple integral

#### **MODULE II - VECTOR CALCULUS**

(20 Hrs)

Vector differential operator – Gradient and Directional derivatives – Angle between the surfaces – Divergence and Curl – Scalar potential – Equation of the tangent plane and normal line – Irrotational and Solenoidal vector fields –Vector integration: Green's theorem in a plane, Gauss divergence theorem and Stoke's theorem (excluding proofs) – Simple applications involving cubes and rectangular parallelepipeds.

#### **MODULE III - FORIER SERIES**

(20 Hrs)

Fourier series: Dirichlet's conditions - General Fourier Series : Problems under  $(0,2\pi)$ - Problems under (0,2l) - Odd and Even Functions : Problems under  $(-\pi,\pi)$  - Problems under (-l,l) - Half range sine series and cosine series - Parseval's Identity.

23CE20	6	PRINCIPLES OF ENGINEERING MECHANICS	3/1/0/4						
Nature o	of Course	Concepts and Analytical							
Pre-Rec	uisites	Fundamentals of basic mathematics and physics							
Course	Objectives								
1	To make	the students understand the vector and scalar represent	ation of						
	forces and	moments and the static equilibrium of particles and rigid bodi	es.						
2	To make	the students understand the properties of surfaces, predi	ction of						
	behaviour	of particles and rigid bodies.							
3	To unders	tand the effect of friction on equilibrium, laws of motion.							
4	To analyze	e the bodies which are in motion using the basics of kinet	ics and						
	kinematics	).							
Course	Outcomes:								
Upon co	ompletion o	of the course, students shall have ability to							
C206.1	Compute t	the resultant force for various force systems using laws of	[U]						
	mechanics								
C206.2	Apply the	equations of statics to determine the unknown reactions and	[AP]						
0200.2	draw shea	r force and bending moment diagram	[, ., ]						
C206.3	Evaluate th	ne geometrical properties of two dimensional objects	[AN]						
C206.4	Compute t	he unknown frictional forces using free body diagram of rigid	[AP]						
0200.4	bodies for Impending Motion								
C206.5	Apply the	equations of dynamics to determine the unknown quantities							
0200.0	in kinetics	and kinematics	[AP]						
Course	Contents:		•						

## Module 1: Equilibrium of Particles and Rigid Bodies

21 Hrs.

Force Systems – Basic concepts, Laws of Mechanics, System of Forces, Coplanar Concurrent Forces, Resolution and resultant of several concurrent forces - Lami's theorem; Equilibrium of particles in 2D. Statics of Rigid bodies in two dimensions - Varignon's theorem; Couples and moment, Equations of equilibrium of rigid bodies in 2D. Beams - types of supports, loads and reactions – Shear force and bending moment diagram for determinate beams (cantilever, simply supported) under single load condition - Point of contra flexure.

#### Module 2: Centre of Gravity, Moment of Inertia and Friction

21 Hrs.

Centroid of simple figures from first principle, centroid of composite sections; Centre of Gravity and its implications; Area moment of inertia - Definition, Moment of inertia of plane sections from first principles, Parallel Axis theorem, Moment of inertia of standard sections and composite sections - Friction: Types of friction, Limiting friction, Laws of friction - Static Friction - simple contact friction in blocks under impending motion.

#### **Module 3: Dynamics of Particles**

18 Hrs.

Kinematics of Particles: Displacements, Velocity and acceleration – Rectilinear motion with uniform and variable acceleration their relationship in linear motion - Introduction to Curvilinear motion (Principles Only) - Kinetics of Particles: D'Alembert's principle and its applications.

Total Hours: 60 Hrs.

23CE20	2	CONSTRUCTION MATERIALS AND TECHNIQUES	3/0/0/3
Nature o	of Course	Theory	
Pre requ	uisites	Introduction to Civil Engineering	
Course	Objectives:		
1	To have a	clear knowledge of construction materials and their properties.	
2	To know th	e market forms of special and alternate building materials.	
3	To learn va	rious testing methods for assessing the strength and quality of materia	ls.
4	To be famil	liar with the several advanced construction techniques and practices.	
00000	Outcomes: empletion of	f the course, students shall have ability to	
C202.1		strate the manufacturing process of building materials and their riate suitability for a given scenario.	[AP]
C202.2		e the characteristics and application of alternate and decorative ction materials.	[AP]
C202.3	Illustrate materia	e the characteristics and applications of protective and special ls.	[AP]
C202.4		and describe the significance of modern machineries and ogy for construction activities.	[AP]
C202.5	Select a	appropriate techniques and tools for construction activities.	[AP]

### **Module 1: Construction Materials**

**Course Contents: Theory** 

15 Hrs.

Bricks and Blocks: Classifications, Manufacturing and Test – Steel: Composition, Types, Manufacturing, Properties and Applications – Aggregates: Natural and Artificial Aggregates, Recycled Aggregates, Grading, Bulking of Fine Aggregates – Cement: Ingredients, Manufacturing, types, grades, properties – Cement mortar – Hydration of Cement.

#### Module 2: Alternative, Decorative, Protective and Special Materials

15 Hrs.

Alternate Materials: Engineering wood, Bamboo, Sustainable particle boards, Veneer, Foam, Eco-friendly materials – Decorative Materials: Panels of laminates, paints, varnishes, distempers, glass, ceramics, plaster, fabric paper – Protective Materials: Sealants for joints, fibre glass reinforced plastic, carbon fiber, thermal insulation – Special Materials: Composite materials and types, Applications of laminar composites.

#### **Module 3: Construction Machineries and Techniques**

15 Hrs.

Machineries for earthmoving – dewatering – concrete mixing – transporting & placing of materials, plastering pre-stressing jacks and grouting equipment, pile driving, lifting (Cranes, Hoists) –

Equipment Productivities – Use of drones for spread out sites – Use of robots for repetitive activities and for modern construction material use and manufacturing of materials – 3D printing – Innovative modern construction tools, accessories and equipment's – Special construction methods: Scaffolding, shoring, underpinning, piling – Conventional construction methods vs Mechanized methods and advantages of latter.

C101.1	Understan waves.	d the basic concepts of oscillation, laser and Electromagnetic	[U]						
C101.2	Interrelate electric and magnetic fields, and predict the behaviour of electromagnetic waves [AP								
C101.3	Estimate the Atomic packing, acquire the basic knowledge about Crystal Lattice and Unit cell.								
C101.4		d the principle and working of reference electrodes, e the knowledge of corrosion control technique and energy	[U]						
C101.5	Interpret th	ne principle and working of analytical techniques.	[AP]						

#### **Course Contents:**

**Harmonic oscillations, Laser and Electromagnetic waves:**periodic motion – Simple harmonic motion: characteristics of simple harmonic motion – Simple spring-mass system – Resonance

**Laser:** Characteristics of laser – Principle of spontaneous emission and stimulated emission – Population inversion – Pumping – Different types of lasers: CO<sub>2</sub>– Qualitative industrial applications of lasers: welding, drilling and cutting.

**Electromagnetic waves:** Concept of Del operator, gradient, divergence and curl operators - Gauss divergence theorem, Stokes theorem.Gauss law of electricity, Gauss law of magnetism, Biot-Savart law and its application: Magnetic field due to Line charge – Ampere's law and its application: magnetic field due to a solenoid, Faraday' law of electromagnetic induction.

15 Hours

**Crystallography and Electrochemistry:** crystal system – lattice –Bravais lattice, calculation of atomic packing factor for simple cubic, body centered cubic, face centered cubic and hexagonal close packed lattice – Miller indices – Crystal imperfections – Point and line imperfections.

**Electrochemistry:** Electrochemical cells-electrolytic cell-reversible and irreversible cells - Free energy and emf series, cell potentials, Nernst equation and applications. Oxidation and

reduction potentials-standard hydrogen electrode, saturated calomel electrode, glass electrode-pH-measurement. *15 Hours* 

**Corrosion and Energy sources, Spectroscopic techniques:** Introduction-types—mechanism of dry and wet corrosion-protective coatings-electroplating of gold-electroless plating of nickel. Energy Sources-Fuel cells (H<sub>2</sub>-O<sub>2</sub>). Storage Devices-Batteries-Alkaline, Lead acid, Nickel cadmium and Lithium-ion batteries.

**Spectroscopic techniques:** Spectroscopy-Beer Lambert's law, principle, instrumentation, and applications of electronic spectroscopy (UV-visible), Vibrational and rotational spectroscopy (IR) and Flame emission spectroscopy (FES).

15 Hours

23TA201	TAMILS AND TECHNOLOGY / தமிழரும்தொழில்நுட்பமும்	1/0/0/1					
Nature of C	Course: C (Theory Concept)						
Pre requisi	tes: NIL						
Course Ob	jectives:						
To know about weaving, ceramic, design and construction technologies in sage.							
2	To know the significance of technologies such as manufacturing, agriculture and irrigation.						
3	To understand the development of Scientific Tamils and Tamil Computing.						
Course Ou	tcomes:						
Upon comp	pletion of the course, students shall have ability to						
C201.1	Describe about the weaving industry in sangam age and ceramic technology.	[U]					
C201.2	Observe the design of houses, sculptures and construction of temples.	[U]					
C201.3	Relate the various manufacturing materials and stone types in Silappathikaram.	[U]					
C201.4	Understand the significance of agriculture and irrigation technology in ancient period.						
C201.5	Explain the growth of scientific Tamil, Tamil computing and digitization of Tamil books.	[U]					

#### **Course Contents:**

Weaving and Ceramic Technology: Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries. Design and Construction Technology: Designing and Structural construction House & Designs in household materials during Sangam Age - Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayaka Period - Type study (Madurai Meenakshi Temple) - Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period.

**Manufacturing Technology:** Art of Ship Building - Metallurgical studies - Iron industry - Iron smelting, steel - Copper and gold - Coins as source of history - Minting of Coins — Beads making-industries Stone beads - Glass beads - Terracotta beads - Shell beads/ bone beats - Archeological evidences - Gem stone types described in Silappathikaram. **Agriculture and Irrigation Technology:** Dam, Tank, ponds, Sluice, Significance of KumizhiThoompu of Chola Period, Animal Husbandry - Wells designed for cattle use - Agriculture and Agro Processing - Knowledge of Sea - Fisheries — Pearl - Conche diving - Ancient Knowledge of Ocean - Knowledge Specific Society.

**Scientific Tamil & Tamil Computing:** Development of Scientific Tamil - Tamil computing - Digitalization of Tamil Books - Development of Tamil Software - Tamil Virtual Academy - Tamil Digital Library - Online Tamil Dictionaries - Sorkuvai Project.

#### **Course Contents: Theory**

#### Course Contents:

#### **Module 1: Introduction and Elements of Architecture**

15 Hrs

Definitions of Architecture – architecture as a discipline – context for architecture as satisfying human needs: functional, aesthetic and psychological- outline of components and aspects of architectural form. Building typologies: Residential, institutional, commercial and Industrial types – Anthropometry and space standards- Functional relationships -Understanding fundamental elements such as point, line, plane, form and space, shape, pattern, light, color, surface and texture. Understanding perceptual effects of geometric forms such as sphere, cube, pyramid, cylinder and cone. Understanding perceptual effects of configuration of architectural spaces – Spatial relationship and its types, Spatial organization and its types – built form and open space relationships.

#### Module 2: Principles of Architecture and Climate responsive design 15 Hrs

Understanding fundamental principles such as proportion, scale, balance, symmetry/asymmetry, rhythm, axis, hierarchy, datum, unity, harmony, dominance, and climax. Movement with reference to the architectural form and space – relationship between architectural form and circulation – Types of circulation. Site analysis and climate responsive design - Site Surveys - Site analysis of natural, cultural and aesthetic factors – topography, hydrology, soils, vegetation, macro/micro climate, surface drainage, accessibility, size and shape, infrastructures available - Site level planning and organization of open, semi-open and built spaces. Man, Climate and Shelter - Factors that determine climate – Characteristics of climate types – Design for various climate types – Passive and active energy controls - Simple passive design considerations.

#### Module 3: Building Bye laws & Building Information Modelling

15 Hrs

Building Rules and Bye-laws - Overview to National Building Code (NBC) -Overview to

Development Control Regulation (DCR) - Guidelines -Floor Space Index (FSI)- Floor Area Ratio (FAR)- Setbacks-Open space reservation (OSR) - Industries - Fire safety regulations-Building services-Building Approval Process -Plan Requirements- Real estate regulatory authority (RERA)- Building Information Modelling –Concepts -Advantages - Drawing based process vs BIM process- 3D Simulations- 4D Scheduling- 5D Costing- 6D Sustainability-7D Facility and Asset Management- Design Coordination - BIM softwares -Case studies.

23IT211		INTRODUCTION TO PYTHON PROGRAMMING	1/0/4/3						
Nature of	Course	F (Theory Programming)							
Prerequis	sites	Nil							
Course O	bjectives:								
1.	To understand	d and execute Python script using types and expressions.							
2.	2. To understand the difference between expressions & statements and to understand								
	the concept of	assignment semantics.							
3.	To utilize high	level data types such as lists and dictionaries.							
4.	To import and utilize a module and to perform read & write operations on files.								
Course O	utcomes								
Upon com	pletion of the o	course, students shall have ability to							
C211.1	Demonstrate	programs using simple python statements and expressions.	[U]						
C211.2	Build control f	low and string concept in python for solving problems.	[AP]						
C211.3	Develop pytho	on programs using functions.	[AP]						
C211.4	Analyze comp	ound data using python lists, tuples and dictionaries.	[A]						
C211.5	Apply python	programs using files, exception, modules and packages.	[AP]						

#### **COURSE CONTENTS:**

#### DATA, EXPRESSIONS, STATEMENTS:

(15 Hours)

Data Types, Variables and Identifiers, Operators and Expression, Conditional Branching Statements, Iterative statements- Nested Loops, Break, Continue, Pass statements, Function - definition and function call, arguments, return statements, Lambda Function and Recursive Function.

#### STRING, LISTS, FUNCTIONS:

(15 Hours)

Strings – Concatenation, Append, Comparing Strings, Iterating Strings, Strings Modules and Functions, Modules – NumPy, Math, List: Operations, Nested list, Cloning, Methods, Looping, Tuple: Operations, Nested Tuple, Tuple assignments, Checking the index, Dictionary: Operations, looping over and Nested Dictionary, Built in functions and Methods.

#### FILES, INHERITANCE:

(15 Hours)

Classes and Objects, Inheritance, Polymorphism, File Handling and Exception Handling.

		Total Hours	45
Labora	atory Component:		
S. No	List of Experiments		
1.	Compute the GCD of two numbers.		
2.	Find the square root of a number (Newton's method).		
3.	Exponentiation (power of a number).		
4.	Find the maximum of a list of numbers.	·	
5.	Linear search and Binary search.		
6.	Selection sort, Insertion sort.		
7.	Merge sort.		
8.	First n prime numbers.		
9.	Multiply matrices.		
10.	Programs that take command line arguments (word count).		
11.	Plotting datasets.		
12.	File handling and plotting.		
		Total Hours: 30	) hou

23PS102		PHYSICAL SCIENCE LABORATORY L/T/PA						
231 3102	(C	Common to I Year B.E. – CIVIL&MECH) 0/0/4/	/2					
	_							
Nature of		: E (Skill based)						
Pre requis		: Basic Applied Science laboratory skills						
Course O	bjectives:							
1		hands-on learning experience in measuring the basic paramete termine the frequency of oscillation.	ers of					
2	To carry out	experiments to understand the basic laws of magnetism.						
3	To provide hattice consta	nands on training to measure the time constant of RC circui ant of cubic crystal structure	t and					
4		nd the principles and applications of electrochemistry and lear rtical methods, and explore the knowledge of various energy so- devices.						
5		nd the concepts of photo-physical and photochemical process	es ir					
Course O	utcomes:							
Upon con	pletion of the	e course, students shall have ability to						
C102.1	C102.1 To determine the frequency of oscillation and laser parameters using							
		aratus and diode laser	[E]					
C102.2	To determine the magnetic field around a current carrying conductor							
C102.3	To determine the time constant of RC circuit and lattice constant of cubic							
	crystal structure							
C102.4	To determine the pH,single electrode potential using reference electrodes							
	and Electrop	lating process based on electrolytic cell.						
C102.5	Interpret the	principle and working of Spectroscopic technique.	[E]					
Lab Comp								
1		on of frequency of transverse and longitudinal wave modes – periment and characteristics of Simple harmonic motion – ab.	[E]					
2	Determinatio	on of wavelength, particle size and angle of divergence using source.	[E]					
3		on of Magnetic field along the axis of current carrying coil- Gee method.	[E]					
4	Determinatio	on of characteristics of RC circuit to find the time constant	[E]					
5	Determinatio	on of lattice constant of cubic crystal structure.	[E]					
6		on of strength of strong acid by pH metry.	[E]					
7		f dissolved oxygen in waste water using Winkler's method.	[E]					
8		on of single electrode potential of Zinc and Copper by	[E]					
9		on of cathode efficiency of Nickel using electroplating process.	[E]					
10		ometry-Estimation of iron in sample water.	[E]					
-		Total Hours:	30

23MC	101		INDUCTION PROGRAMME (Common to all B.E / B.TECH/M.TECH)	1/0/0/0					
Natur	e of C	Course	Induction Programme						
Pre re	quisi	tes	Nil						
Cours	Course Objectives:								
1	To have broad understanding of society and relationships								
2			character and 135abelin one's responsibility as an eruman being	ngineer, a					
3	To i	ncorporate	meta skills and values						
Cours	e Ou	tcomes:							
Upon	com	pletion of t	he course, students shall have ability to						
C101	1.1	Explore ac	cademic interest and activities	[AP]					
C101	1.2	Work for e	excellence	[AP]					
C101	C101.3 Promote bonding and give a broader view of life and character [AP]								

Course Contents: Theory

**PHYSICAL ACTIVITY:** Research over the past years has shown Yoga to have stress-relieving powers on students, paving the way for improved academic performance with the practice of asanas, meditation and breathing exercises. To prove these words Yoga classes has been planned in this module.(CO mapping: C101.1, C101.2, C101.3)

CREATIVE ARTS (students can select any one of their choice): Cultural development supports students to understand, feel comfortable with, value and appreciate the potential enrichment of cultural diversity. They should challenge discrimination, whether based on cultural or racial difference. Students should experience cultural traditions embedded in arts, crafts, language, literature, theatre, song, music, dance, sport, Science, technology and travel. Students should develop an appreciation of beauty both in experiencing artistic expression and by exploring their own creative powers. To inculcate those skills they are given a chance to exhibit their talents through painting, sculpture, pottery, music, dance, craft making and so on. .(CO mapping: C101.1, C101.2, C101.3)

**UNIVERSAL HUMAN VALUES:** Moral development involves supporting students to make considered choices around their behaviour and the values that provide a framework for how they choose to live. Moral development is also learning about society's values, understanding the reasons for them, how they are derived and change; and how disagreements are resolved. Students must consider the consequences of personal and societal decisions on the wider community – local and global- and on the environment and future generations. To acquire this the students are exposed to training to enhance their soft skills. .(CO mapping: C101.1, C101.2, C101.3)

**LITERARY AND PROFICIENCY MODULES:** Social development helps students to work effectively together, developing the inter-personal skills required to relate positively with their peers and people of all ages. Students must also understand how to participate productively in a diverse and plural society and learn about, and how to effectively engage

with societal institutions and processes. They should understand that a person may have different roles and responsibilities within society. To reach this the following aspects are given in the form of Reading, writing, speaking – debate, role play etc. Communication and computer skills. (CO mapping: C101.1, C101.2, C101.3)

**LECTURES BY EMINENT PEOPLE:** Teaching with Lectures. ... It is essential to see lectures as a means of helping students learn to think about the key concepts of a particular subject, rather than primarily as a means of transferring knowledge from instructor to student. During the induction period students will attend to Guest lectures by subject experts.(CO mapping: C101.1, C101.2, C101.3)

VISIT TO LOCAL AREAS: Traveling is in fact a way of learning to learn. You are out of your comfort zone and so you must learn to be able to adapt to a new learning environment in a very short time. It also helps in your overall learning as well. In the induction period students will be taken to different places near college to learn new things. Eg.Meditation centre/orphanage/Hospital.(CO mapping: C101.1, C101.2, C101.3)

**FAMILIARIZATION TO DEPARTMENT/BRANCH INNOVATION:** Hod's of different branches will present about their department followed by department visit to view various facilities available at their department, new innovations from students and faculties etc. .(CO mapping: C101.1, C101.2, C101.3)

#### **Course Contents: Theory**

#### **Natural Resources:**

Introduction-Forest resources: Use and abuse, case study-Major activities in forest-Water resources-over utilization of water, dams-benefits and problems. Mineral resources-Use and exploitation, environmental effects of mining- case study–Food resources- World food problems, case study. Energy resources -Renewable and non-renewable energy sources Land resources- Soil erosion and desertification – Role of an individual in conservation of natural resources.

#### **Environmental Pollutions:**

Definition – causes, effects and control measures of: a. Air pollution - Acid rain - Greenhouse effect-Global warming- Ozone layer depletion – case study- Bhopal gas tragedy. Water pollution c. Soil pollution - Solid waste management-Recycling of plastics-Pyrolysis method- causes, effects and control measures of municipal solid wastes d. Noise pollution. e. Nuclear hazards-case study-Chernobyl nuclear disaster-Role of an individual in prevention of pollution.

#### Social issues and the Environment:

Sustainable development-water conservation, rain water harvesting, E-Waste Management – Environmental ethics: 12 Principles of green chemistry-Scheme of labelling of environmental friendly products (Eco mark) – Emission standards – ISO14001 standard.
