

SDG 10: REDUCED INEQUALITY

The reduction of inequality in all its manifestations, both within and between nations, is the main objective of Sustainable Development Goal 10 (SDG 10). Since inequality impacts everyone's access to opportunity, economic stability, and social cohesiveness, it is a significant obstacle to sustainable development. SDG 10 acknowledges that social exclusion, economic inequality, and discriminatory behaviors that prevent people from realizing their full potential must be addressed. It highlights how crucial it is to create inclusive communities where everyone can gain from progress.

POLICY FOR SDG 10:

Our institution, SKCET, aims to Increase the incomes of the poorest 40% of the population at a faster rate than the national average and maintain this growth. SDG 10 is a key goal for fostering sustainable, inclusive, and equitable development across the world. Achieving this goal requires a combination of policies that promote income redistribution, eliminate discriminatory practices, and

enhance social protection. By addressing the root causes of inequality, we can ensure that everyone—regardless of their economic status.

ACTIONS PLANNED:

Awareness events for reduction of inequality.
