REPORT

About the Program

Economic hardship exacts a toll on millions of families worldwide – and in some places, it comes at the price of a child's safety.

Roughly 160 million children were subjected to child labour at the beginning of 2020, with 9 million additional children at risk due to the impact of COVID-19. This accounts for nearly 1 in 10 children worldwide. Almost half of them are in hazardous work that directly endangers their health and development.

Children may be driven into work for various reasons. Most often, child labour occurs when families face financial challenges or uncertainty – whether due to poverty, sudden illness of a caregiver, or job loss of a primary wage earner.

The consequences are staggering. Child labour can result in extreme bodily and mental harm, and even death. It can lead to slavery and sexual or economic exploitation. And in nearly every case, it cuts children off from schooling and health care, restricting their fundamental rights. Since, students are the future of the nation and the gift to the world, an awareness programme was initiated to walk around the area in and around Kuniamuthur and discuss with them about importance of education on the World Day against Child Labour. Children removed from labour must also be safely returned to school or training. UNICEF supports increased access to quality education and provides comprehensive social services to keep children protected and with their families.

Outcomes:

- As part of "World Day against Child Labour" Department of **Science and Humanities** conducted "**An Awareness Programme**" on 14.06.2023 in and around Kuniamuthur area.
- An overwhelming response of over 35 aspiring and vibrant participants of various schools participated in this programme.
