D3. Project Laboratory/Research Laboratory

The Department of Information Technology has established project laboratories, research facilities and Centre of Excellence to promote innovation, experiential learning and industry-oriented skill development. These facilities provide students with opportunities to undertake real-world projects, engage in research activities and gain practical exposure to emerging technologies through faculty mentorship and industry collaboration.

Table 7.5.1 presents the detailed information about the project laboratories, research laboratories and Centre of Excellence available in the department.

Name of the Project Lab / Research Lab	Purpose	Outcome
Tim Berners-Lee Laboratory	To facilitate student project development and research activities through hands-on learning, prototype development, experimentation, innovation, and collaborative problem-solving.	Development of innovative prototypes, working models, research outcomes, and application-oriented solutions through project-based learning, experimentation, and research activities.
Centre of Excellence (CoE)		
Virtusa Consulting Services Private Limited – Centre of Excellence (CoE) Lab	To provide industry-aligned training, mentoring, and practical exposure in software development and emerging technologies, supporting students industry readiness.	The Virtusa CoE enhances industry readiness through practical **Java Full Stack Development** training, hands-on projects, technical assessments, and industry interaction. It enables students to develop skills in modern full-stack technologies and provides faculty members with opportunities to strengthen their technical expertise through industry-led training and practical projects. The CoE helps bridge the gap between academic learning and industry requirements.
Aspire Systems (India) Private Limited – Centre of Excellence (CoE) Lab	To bridge the academia–industry gap through hands-on training, real-time projects, industry-driven learning, and professional skill development.	Skilled graduates with practical software engineering expertise, industry exposure, and improved employability.
Design Thinking and Idea Centre of Excellence (CoE) Lab	To encourage creativity, design thinking, ideation, and collaborative innovation to address real-world challenges.	Innovative ideas, proof-of-concept models, prototypes, and potential solutions for societal and industrial needs.
AMYPO Skill Development Centre	To establish an industry-oriented **AMYPO Centre of Excellence (CoE)** to strengthen students' programming, coding, problem-solving, and project development skills through continuous hands-on training and industry mentoring.	Industry-ready graduates with enhanced programming, coding, problem-solving, and project development skills, supported by industry-oriented practical exposure and mentoring.

The Department of Information Technology (IT) has established a dedicated Project and Research Laboratory, along with Industry-supported Centres of Excellence (CoEs) in collaboration with Virtusa and Aspire Systems, and a Design Thinking and Idea Lab. These facilities provide an industry-oriented ecosystem for experiential learning, technology upskilling, innovation, project development, research, and employability enhancement. The CoEs bridge the gap between academic learning and industrial practices by providing students and faculty members with exposure to contemporary technologies, industry-relevant tools, company-provided real-world use cases, and professional development practices.

The Project and Research Laboratory serves as a dedicated workspace for students, faculty members, and research scholars to undertake academic and industry-oriented projects, research activities, innovation, experimentation, and collaborative problem-solving. The laboratory infrastructure supports project development, prototype design, implementation, testing, validation, data analysis, and demonstration. Industry partners also provide real-world use cases and problem statements, enabling students to develop practical solutions aligned with current industry requirements.

The facility provides a conducive environment for faculty members and research scholars to formulate research problems, conduct experiments, develop prototypes, analyse data, and prepare research outcomes for publication in reputed journals and conferences. It also encourages faculty–student research collaboration and interdisciplinary research activities.

These facilities foster a collaborative and productive environment where students and faculty members can continuously engage in projects, research, and innovation. They contribute to strengthening the departments research culture, publication output, innovation ecosystem, experiential learning, and industry readiness.

The Department of Computer Science and Engineering (CSE), Sri Krishna College of Engineering and Technology (SKCET), established a **Centre of Excellence (CoE) in Java Full Stack Development** in collaboration with **Virtusa** through an MoU signed on **22 March 2019**. The CoE was established to bridge the academia–industry gap through industry-oriented training, experiential learning, and practical exposure to emerging technologies. It supports the **M.Tech Computer Science and Engineering (Five-Year Integrated) programme** by developing students technical and professional competencies.

The CoE provides structured training in **Software Engineering, Core Java, JDBC, SQL, HTML, CSS, JavaScript, React, Spring Boot, REST Services, Hibernate, JPA, and Software Design Patterns**, integrating theoretical concepts with hands-on programming, application development, and project-based learning.

The CoE supports **student employability and faculty development** through technical training, assessments, industry engagement, Virtusas **Train-the-Trainer programmes**, technology orientation sessions, and hands-on projects reviewed by Virtusa experts. Faculty training covers **Java Full Stack Development, Design Patterns, Advanced Java, Angular, React, Spring Boot, Hibernate, and Maven**, enabling the integration of industry practices into teaching-learning activities.

The **Department of Information Technology (IT)utilizes the CoE facilities** for academic and skill-development activities, including hands-on training, programming, application development, project-based learning, and technology-oriented activities. This shared facility provides IT students and faculty with access to industry-relevant technologies and practical learning resources, supporting **experiential learning and industry-oriented skill development**.

Aspire Systems (India) Private Limited

The Aspire Systems was established to bridge the gap between academic learning and industry expectations through industry-oriented training, project-based learning, and experiential education. The initiative aims to develop industry-ready graduates with the technical knowledge, practical skills, and problem-solving capabilities required to contribute effectively in professional environments.

The collaboration was formalized through a Memorandum of Understanding (MoU) signed on 31 January 2020, with a focus on a structured Hire–Train–Deploy model. Under this initiative, selected students are recruited during the seventh semester and undergo intensive industry-oriented training during the final semester. The Aspire Systems Talent Nurturing team, in coordination with the faculty SPOC, monitors student progress through regular reviews, assessments, and daily stand-up meetings.

The Department of Information Technology utilizes the Aspire Systems CoE for providing students with hands-on exposure to Core Java, Object-Oriented Programming, HTML, CSS, JavaScript, SQL, multithreading, exception handling, packages, interfaces, and application development. The CoE is utilized for faculty-supported training, industry interactions, technical assessments, project reviews, and practical learning activities. These activities enable students to strengthen their programming skills and apply theoretical concepts to real-world application development.

Faculty members and students of the Department of Information Technology have benefited from the effective utilization of the CoE through industry interaction, technical mentoring, practical training, project guidance, assessments, and exposure to current software development practices. The CoE has also supported several completed and ongoing student software and product development projects, providing opportunities for students to apply their knowledge in practical scenarios.

Regular technical assessments, industry mentoring, project reviews, and feedback help students improve their application design, coding practices, debugging, and problem-solving capabilities. Faculty members also gain exposure to industry practices and emerging software development requirements, which supports the enhancement of teaching, mentoring, and project guidance.

Through its effective utilization, the Aspire Systems CoE strengthens experiential learning in the Department of Information Technology and provides students and faculty members with meaningful industry exposure. The initiative contributes to improved technical competency, practical application skills, project development capabilities, and overall industry readiness of students.

Design Thinking and Idea Lab

The Department of Information Technology utilizes the Design Thinking and Idea Lab to provide students with hands-on exposure to creativity, innovation, problem-solving, and prototype development. The facility is used for design thinking activities, ideation sessions, multidisciplinary project discussions, innovation challenges, hackathons, and development of technology-based solutions to real-world problems. Students apply the stages of the Design Thinking process—Empathize, Define, Ideate, Prototype, and Test—to identify user requirements, generate feasible ideas, develop prototypes, and validate proposed solutions. The lab supports project-based and experiential learning and helps students strengthen technical, analytical, communication, teamwork, leadership, and entrepreneurial skills through collaborative activities.
